

IMPORTANT NOTICE TO OUR VALUED ALLIANCE CUSTOMERS

- THE ONTARIO GOVERNMENT PASSED BILL 77, UPDATING THE ONTARIO FIRE CODE TO MANDATE THE USE OF CARBON MONOXIDE DETECTORS
- Bill 77 states that carbon monoxide warning devices must be installed in residences that have a fuel-burning device such as a fireplace, gas stove, water heater or furnace, or if the home is attached to a garage
- Carbon Monoxide Alarms will now be required near all sleeping areas in residential homes and in the service rooms and adjacent sleeping areas in multi-residential units
- The Ontario Building Code has required carbon monoxide detectors in new residential construction since 2011, but this bill now applies to all homes in the province. While there will be an emphasis on public education for the next few months, failure to install a carbon monoxide detector carries a hefty fine.

TWO RECOMMENDATIONS FOR ALLIANCE CUSTOMERS

1. LOCAL TYPE ALARM: (Sounding only at the premise and installed by customer)

C.O. Detectors are available from your local hardware store and are hard wired, plug-in or battery type, with a built-in sounder. Designed to alert the occupants on the premise only, they range in price from \$30.00 to \$95.00.

2. MONITORED TYPE ALARM: (Sounding on the premise AND signaling the monitoring station. Professionally installed by an Alliance Technician)

C.O. Detectors are available from Alliance that will connect to your existing security control panel and will send an emergency signal to the monitoring station for dispatching the proper authorities. Installed price is \$195.00 with no increase to your monthly monitoring.

OUR RECOMMENDATION IS:

Installation of one alarm unit on each floor to awaken the occupants; one of them being a monitored unit to bring the authorities.

CALL US TODAY AT 1-888-354-3890 TO ADD A CARBON MONOXIDE DETECTOR TO YOUR SECURITY SYSTEM.

If it is more convenient, contact us by e-mail at CO2@alliancesecurity.ca

Thank you for entrusting Alliance with your security and safety.
